PROFESSIONAL SUMMARY

Full-Stack Game Developer & Former Lead with 5+ years of experience building cross-platform 2D/3D, VR, and multiplayer games in Unity, powered by ASP.NET Core backends and Azure cloud hosting.

WORK EXPERIENCE

AOT (Project Based | June 2026 – September 2026) — Unity Developer

- Engineered an end-to-end, cross-platform (WebGL & Mobile) virtual campus gamification prototype as sole developer, integrating real-time multiplayer networking (Photon Fusion), voice/text chat (Vivox & Photon), and an ASP.NET Core / EF Core backend.

NTEK (April 2021 – June 2026) — Full Stack Developer

- Led development of cross-platform multiplayer titles (PC/Android/iOS) using Photon and Mirror
- Designed and developed single-player educational games for international school clients (Korea), optimized for Android
- Developed a VR educational experience for Mindanao State University (MSU) using Mirror for low-latency LAN multiplayer
- Optimized game delivery via Unity Addressables for efficient DLC and modular content updates
- Developed Metaverse applications with AI integration so players can talk to NPCs/pets
- Assisted Backend Team developing REST API using ASP.NET Core / EF Core

ALORICA (September 2019 –January 2020) — Customer Service Representative

- Managed high-volume customer inquiries regarding credit card accounts, billing, and rewards
- Acted as first responder for lost/stolen cards and fraud detection

JLCG (March 2018 – August 2019) — Unity Developer

- Integrated specialized hardware (AR, Kinect sensors) within Unity for motion-controlled experiences
- Developed a custom Event Registration System with automated data processing

SKILLS

- ASP.NET Core
- Docker
- Azure Cloud Hosting
- GitHub Actions (CI/CD)
- React
- Unity 2D / 3D Engine
- Unity Addressables
- Photon Frameworks
- Cocos 2D
- Mirror Networking
